The Choice for Confidence and Value...

Assorted Specimen Containers

Distributed by Clinical Science Products, Inc. these assorted containers are designed specifically for the safe collection and transport of urine and more.

Leak-Resistant for Utmost Reliability

- The caps create a leak-resistant seal for utmost confidence in transport
- Dual-threaded caps make them virtually impossible to cross-thread

Designed for Superior Safety & Handling

- The container has top and bottom positive grip knurls for ease to grip and open with or without latex gloves for utmost handling and safety
- Containers can be stacked atop one another, making them easier to store and saving space

Feature-Packed

- 100% virgin grade polypropylene containers allow higher clarity to see samples, and will not discolor or become brittle
- Gamma irradiation sterilization means no potential for residue that can cause false test results
- Sterile indicator tab helps assure product sterility and tamper evidence protection before use
- ID label affixed to container
- 48 mm opening
- Meets 95 kPa standards for transport to laboratory

Look to Clinical Science Products, Inc. for your container collection needs with confidence.

FREE SAMPLES are available upon request.
